WHAT NAAC DOES

Participating Organizations

The North American Actuarial Council (NAAC) brings together nine actuarial organizations on the North American continent:

- American Academy of Actuaries (Academy) (U.S.-based)
- ASPPA College of Pension Actuaries (ACOPA) (U.S.-based)
- Asociación Mexicana de Actuarios (AMA)
- Asociación Mexicana de Actuarios Consultores (AMAC)
- Canadian Institute of Actuaries (CIA)
- Casualty Actuarial Society (CAS) (U.S.-based)
- Colegio Nacional de Actuarios (CONAC)
- Conference of Consulting Actuaries (CCA) (U.S.-based)
- Society of Actuaries (SOA) (U.S.-based)

Guiding Principles of NAAC

Section 2 of the North American Actuarial Council Working Agreement provides the official description of NAAC's purpose. It is published in the NAAC Manual and is included in publications distributed by the Participating Organizations to their members.

The Participating Organizations jointly acknowledge that:

- The operating environments in the three North American countries are very different,
- The Participating Organizations' members expect the organizations to leverage resources and take appropriate advantage of synergies, and
- Increased information sharing and dialogue among the Participating Organizations has the potential to yield collective insights valuable to each organization.

Accordingly, the Participating Organizations define NAAC's purpose as follows:

- 1. NAAC is to be a catalyst for dialogue on key issues facing the North American actuarial profession.
- 2. NAAC is to be a facilitator of opportunities for leveraging of resources across organizations.
- 3. NAAC is to be a source of knowledge in identifying conditions, trends, assumptions, and key issues affecting the North American actuarial profession and benchmarking best practices among member organizations.
- 4. NAAC is to be a forum for information sharing on current and potential activities among the North American actuarial organizations.
- 5. NAAC is to be a forum where networking occurs and camaraderie is built among the leaders of the North American actuarial organizations.

In fulfilling its purpose, NAAC shall abide by the following guiding principles:

- The conditions, cultures and perspectives of each individual country and their member organizations will be respected and valued.
- The autonomy of each member organization to pursue its mission and purpose will be preserved.
- The public interest will always be a primary consideration.
- The best interests of the profession will always be considered.

Looking Ahead

Leaders of NAAC member organizations are responsible for supporting the spirit and communicating the content of the Working Agreement to their respective organizations. In the years to come, NAAC shall serve as a forum for the exchange of ideas, common problems, and common solutions for the myriad issues facing the North American actuarial community.

2018-2019 NAAC ACCOMPLISHMENTS

NAAC SharePoint Site

The NAAC SharePoint site enables NAAC members to share files and documents, including meeting materials, approved minutes, the NAAC manual, the NAAC annual report, policy statements, and other information. Access is limited to authorized users only.

Discussions with Public Officials

Visit to the Canadian Senate and Discussion of Its Role within the Canadian Government Structure

Hon. Senator Pierre Dalphond provided NAAC members with an overview of the role of the Canadian Senate and explained the history of Canada's federal structure.

Information-Sharing Among NAAC Member Organizations

Discussion of Recent Developments with the International Actuarial Association (IAA) NAAC members discussed their differing views of the IAA's restructuring.

Environmental Scanning

NAAC members saw a presentation of the results of the SOA's environmental scanning process, which identified the trends the SOA has found to be affecting actuaries: big data, data analytics, and predictive modeling. They also discussed what they feel will ensure the long-term growth of the profession.

Actuaries Climate Index and Actuaries Climate Risk Index

NAAC members were advised of the progress being made toward the release of these indices, a long-standing research project involving the Academy, the CAS, the CIA, and the SOA. The Actuaries Climate Index has been released (http://actuariesclimateindex.org/home/) and progress continues to be made toward the Actuaries Climate Risk Index.

Discussion of How Canada is Adapting to Climate Change

NAAC members saw a presentation that addressed the rising cost of catastrophic events like floods. They discussed the proportion of insured to uninsured losses and its economic consequences.

Autonomous Vehicles

NAAC members saw a presentation on autonomous vehicles. This presentation discussed the degree of technological advancement in the field and the technology's possible future applications. It also addressed how to insure these vehicles based on the legal liability issues their use raises.

Measuring, Monitoring, and Managing Distracted Drivers

NAAC members saw a presentation on how technological advances incorporated into new vehicles are making it easier for insurance companies to better understand drivers' behavior, and how accessing this information influences insurance companies' decision-making.

Educative Statement and Primer on Rating Variables

NAAC members saw a presentation on this topic in relation to P&C insurance.

Discussion of Various Pension Issues

The Canadian Retirement System

NAAC members saw a presentation on the history of the Canadian Pension Plan and the challenges it faces.

Different Measures of the Same Pension Plan Liability

NAAC members saw a presentation about how different actuarial methods can result in different measures of the same pension plan liability.

Integrating Actuarial and Data Science Skills in the Workplace

NAAC members saw a presentation on this topic.

Promoting the Profession

NAAC members discussed their respective efforts to create new opportunities for actuaries.

Discussion of the Meaning of "Public Interest" in a Professional Context

NAAC members saw a presentation on this topic.

NAAC Agenda-Setting

In keeping with their previous commitment to do so, NAAC members have addressed broad discussion topics to encourage spontaneous discussion, which helps to identify naturally collaboration opportunities among NAAC member organizations.

NAAC MEMBERS AND STAFF

The North American Actuarial Council is composed of up to two officers of each Participating Organization. One of the two officers is the president of the Participating Organization, and the other is usually the president-elect, although an organization can appoint another officer it considers more appropriate.

NAAC STAFF

The executive directors of the Participating Organizations attend and participate in NAAC meetings, but are not members of NAAC and do not vote.

Chief Staff Officers

Mary Downs Academy Executive Director

Marty Pippins ACOPA Executive Director (as of May 2018)

Michel Simard
CIA
Executive Director

Cynthia ZieglerCAS
Executive Director

Kelly Fanella CCA Executive Director

Patricia Alfaro CONAC Executive Director

Greg Heidrich SOA Executive Director

Other Staff

When appropriate, the Academy agrees to make its legal counsel available to NAAC, and to coordinate, upon request, with counsel for the CIA and the Mexican organizations.

Academy Senior Policy Analyst Claire Mickelson provides staff support for NAAC. She can be reached at 202-223-8196 or at mickelson@actuary.org

NAAC Participating Organizations

NAAC brings together the five national actuarial organizations in the United States, the three in Mexico, and the Canadian Institute of Actuaries. The self-described missions of the nine Participating Organizations are summarized as follows:

American Academy of Actuaries (Academy)

The Academy serves the public and the U.S. actuarial profession. To accomplish this, as the public voice for the United States actuarial profession, the Academy provides independent and objective actuarial information, analysis, and education for the formation of sound public policy; provides for the establishment, maintenance, and enforcement of high professional standards of actuarial qualification, practice, and conduct; advances actuarial practice by informing and educating its members on public policy and professionalism issues and current and emerging practices; identifies and addresses issues on behalf of the public interest on matters in which actuarial science provides a unique understanding; increases the public's understanding and recognition of the value of the actuarial profession; provides opportunities for professional development of its members through volunteerism and service to the profession; facilitates and coordinates response to issues of common interest among the U.S.-based actuarial associations; and coordinates the representation of the U.S. profession globally. The vision of the Academy is that financial security systems in the United States be sound and sustainable, and that actuaries be recognized as pre-eminent experts in risk and financial security.

ASPPA College of Pension Actuaries (ACOPA)

All credentialed actuarial members of ASPPA are members of the ASPPA College of Pension Actuaries (ACOPA). ACOPA is a part of the American Society of Pension Professionals and Actuaries (ASPPA). The major goal of ASPPA and ACOPA is to educate all retirement plan professionals and to preserve and enhance the employer-based retirement system as an essential part of a national retirement income policy in the United States. ACOPA is responsible for identifying and addressing the professional development needs of the actuarial membership of ASPPA. ACOPA is also the primary source of professional organizational support for pension actuaries, and is charged with carrying out ASPPA's responsibilities as one of the recognized U.S.-based actuarial organizations and as a member of NAAC.

Canadian Institute of Actuaries (CIA)

As the national organization of the actuarial profession in Canada, the Canadian Institute of Actuaries (CIA) serves both the public interest and the profession by promoting the advancement of actuarial science; providing for the education and qualification of current and prospective members; providing professional guidance to its members and ensuring that actuarial services they provide meet the highest standards; and advocating for the profession and providing timely and relevant contributions to the development of public policy. The vision of the CIA is for its members to be recognized as trusted leaders in the quantification and management of risks and contingent events.

Casualty Actuarial Society (CAS)

The purposes of the Casualty Actuarial Society are to advance the body of knowledge of actuarial science applied to property, casualty, and similar business and financial risks, to establish and maintain standards of qualification for membership, to promote and maintain high standards of conduct and competence for the members, and to increase the awareness of actuarial science. The vision of the CAS is to be the pre-eminent resource for education, knowledge, experience and applied research for those actuaries who specialize in property, casualty, and similar business and financial risks, including the field known as general insurance.

Conference of Consulting Actuaries (CCA)

The Conference of Consulting Actuaries provides quality education and facilitates networking among established and aspiring leaders in the actuarial consulting community. The CCA is dedicated to supporting the professional needs and career success of consulting actuaries.

Mexican Association of Actuaries (AMA)

The Mexican Association of Actuaries supports the Mexican actuarial professionals working on the insurance and surety industries in maintaining high standards of professional integrity and technical expertise through strong continuing education programs, and thereby promotes the dignity of the profession and enhances the public's recognition of the profession's value.

Mexican Association of Actuarial Consultants (AMAC)

The purpose of the Mexican Association of Actuarial Consultants is to advance the quality of actuarial consulting practice in Mexico by providing continuing education and business support services to Mexican actuaries in consulting practice.

National College of Actuaries (CONAC)

The National College of Actuaries serves as the professional membership organization for all the actuaries licensed to practice in Mexico, regardless of their specialty area; advises the Mexican government concerning public policy matters with actuarial implications; and fosters actuarial education and research in Mexico.

The Society of Actuaries (SOA)

The Society of Actuaries is an educational, research, and professional organization dedicated to serving the public and Society members. Its mission is to advance actuarial knowledge and to enhance the ability of actuaries to provide expert advice and relevant solutions for financial, business, and societal problems involving uncertain future events. The vision of the SOA is for actuaries to be recognized as the leading professionals in the modeling and management of financial risk and contingent events.
